

EarthLink® Business T1

Reliable T1 access that fits your budget

High bandwidth.

Fast, secure connections with high bandwidth are a necessity for businesses to compete in today's economy. EarthLink Business T1 is an affordable, business-class, high-speed solution that's available in areas not served by other broadband services. Based on T1 technology, it offers EarthLink's most reliable connectivity no matter where your business is located.

A trusted partner.

EarthLink Business T1 offers a reliable high-speed connection so your company can be more productive and successful. And when you partner with EarthLink, the business expert, you also get dedicated Priority Business Customer Service & Tech Support, best-in-class Service Level Agreements, and over 10 years of Internet expertise from an industry leader.

EarthLink Business T1 delivers the features your business needs:

- **T1 local-loop technology:** our most reliable business connection
- **Extended coverage:** available in areas not served by DSL services
- **Exceptional value:** only a fraction of the cost of a traditional T1
- **Connect your entire office:** high-speed Internet access for every employee
- **Performance guarantees:** our industry-leading SLA guarantees 99.99% uptime
- **Priority Business Support:** our dedicated business team is available 24/7
- **T1 router with built-in firewall:** business-class protection against security threats
- **8 static IP addresses:** host your own email, Web, VPN, and FTP servers
- **25 email accounts:** each box protected by spamBlocker, EarthLink's powerful protection against junk email
- **Unlimited dial-up access:** with thousands of local access numbers you can stay connected wherever your business takes you
